

R E S T A U R A N T

Look around! Mother Nature is at play.

Here you'll experience hundreds of colorful bird species squawking and singing, more than a thousand flowering plant species perfuming the air, more than a hundred tropical fruiting species offering sweet nourishment, dozens of stingless bee species creating rare medicinal honey, and soil so rich and deep that even our dreams take root and grow. We thank our neighboring volcanos for making their mineral contributions over the millennia. We thank our neighbor the Children's Eternal Rainforest for protecting the Caribbean slope of one of the most biodiverse regions on the planet. We thank our dedicated farmers and imaginative cooks for embracing our regenerative mission.

You are participating in the healing of the planet with each sip and mouthful. Our regenerative dairy is an example. Our "girls on grass" feast on our grasses, herbs, and flowers and give us rich milk for our dairy needs. In return, they help us nourish and enliven our pastures and fields. You're not just drinking kefir - you're partnering with Cowgirl, Sin Cola, Esperanza, Sissie, and Mimi in regenerating our ecosystem. And the many exotic fruits you're enjoying - they're part of our permaculture design. Add sunlight to moonbeams to raindrops to regenerating soil and you get Finca Luna Nueva.

Plants lean out for sunlight, moths lean out for moonlight, and children lean out for love. You're leaning out, too. That's why you're here, experiencing with us the rich abundance of this regenerative farm.

¡PURA VIDA!
